

ERP selection, ERP evaluation and ERP rescue

Put problems under the right perspective,
choose a manageable path and mitigate risks.

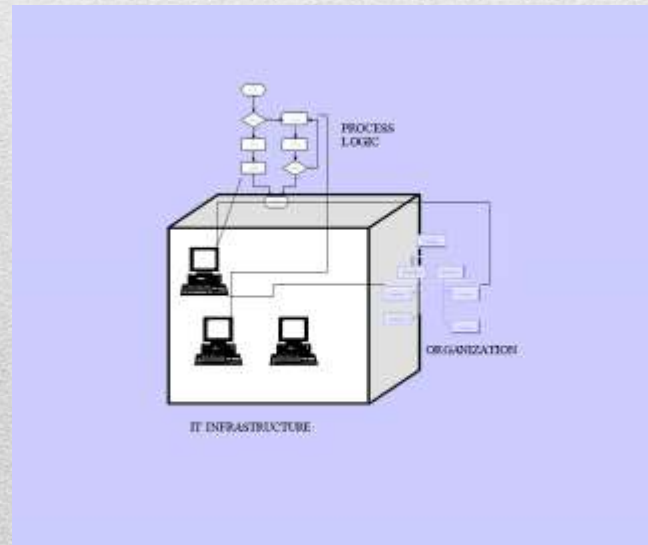

Product configuration:

1. Analysis of product configuration and quoting process
2. Product and machine costs
3. Link with CAD tools
4. Interaction with customer orders, work orders, Available-to-Promise (ATP) cycles, etc...

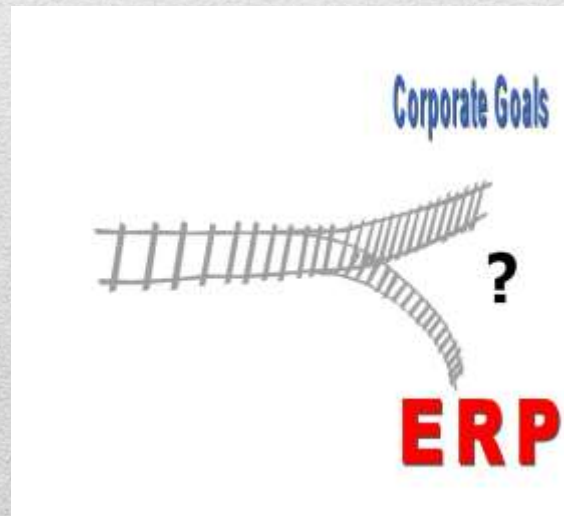

IT system selection (specialised and/or ERP)

1. Analysis of business processes
2. Re-organisation and optimisation
3. Candidate systems shortlisting (3 or 4 systems)
4. Joint system evaluation
5. Assistance on implementation stage.

ERP Rescue

1. Why it went wrong
2. Way-out strategy
3. Project planning
4. Assistance on implementation stage.

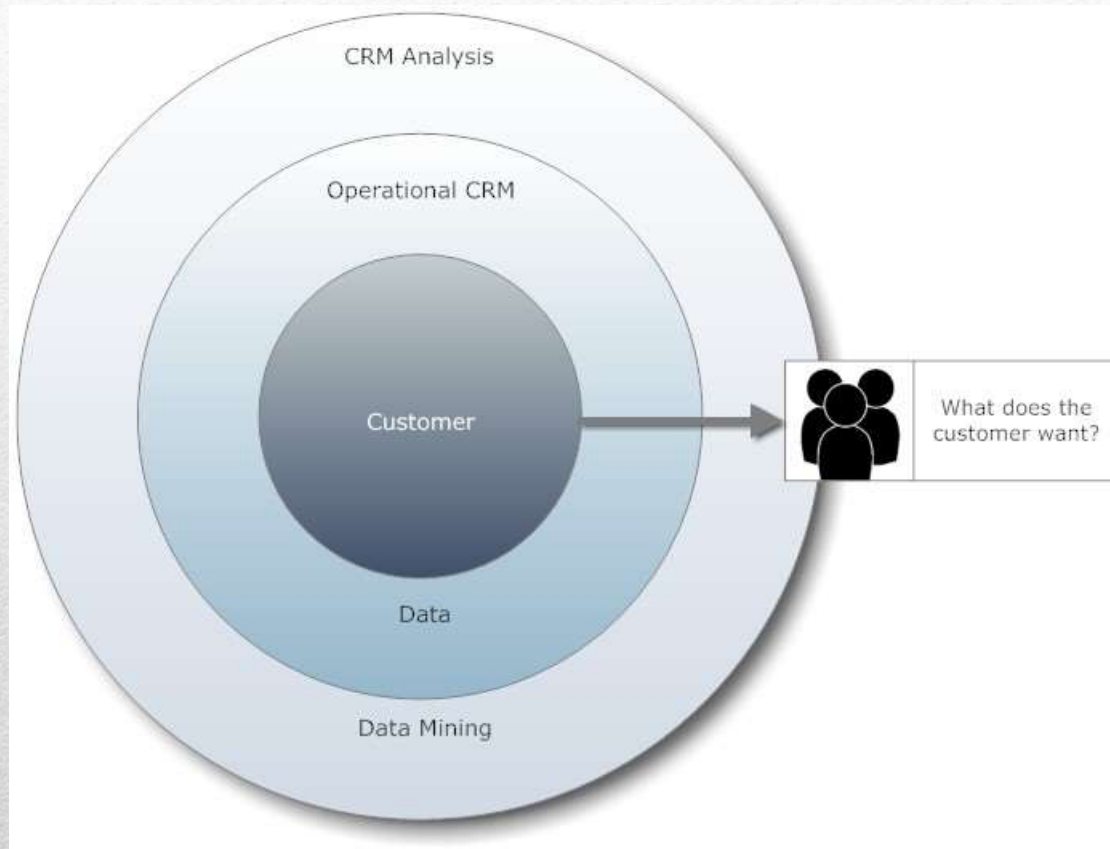

Logistics Management Programme

1. Analysis of SCM / Production processes
2. Site layout optimisation
3. Key Performance Indicators (KPIs)
4. Interaction with customer orders, work orders, Available-to-Promise (ATP) cycles, etc...

Analysis based on your customers' needs
